Forecast for Thursday 28 Nov 2024

Weather: Clear conditions overnight with frost and icy stretches developing on untreated surfaces. A few mist and fog patches to start the day but otherwise a bright or sunny morning. Cloud thickening during the afternoon with some light rain or drizzle at times around western hills, freshening Southeasterly winds adding to the windchill on the hills.

Chance of cloud-free hill tops above 600m: 70%, patchy low cloud on the hill tops at first, increasing low cloud later.

Low cloud and visibility: Patchy cloud above 700m at the start of the day but otherwise mostly clear hill tops expected. Cloud thickening and lowering during the afternoon with scattered layers above 500m particularly on southern hills. Excellent visibility expected in the morning becoming moderate by late afternoon.

Meteorologist's View

Strengthening Southeasterly winds during the afternoon, milder air spreading east during the day.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
15:00 on Wed 27 Nov 2024	7.8mm	11.4mm	20.8mm

Forecast for Friday 29 Nov 2024

Weather: Partly cloudy with some low cloud and drizzle at times particularly around hills further south and west. A few bright or sunny spells developing especially in the east. Cloud will thicken in the afternoon with some light rain expected by late afternoon.

Maximum wind: Southeasterly 20 mph with gusts 30mph at times.

Chance of cloud-free hill tops above 600m: 50%, more chance further east during the day.

Low cloud and visibility: Low cloud layers will be broken above 500m in the west but more scattered around 600m in the east. Cloud will become more extensive later in the afternoon. Visibility will be good for much of the day, turning moderate in any drizzle in the west at times and later in the day as rain arrives.

Temperature: **Valleys:** Plus 5 rising to plus 9 Celsius.
At 600m: Plus 6 Celsius.
Freezing level: Above all summits.
